Flow4J Integration in the Eclipse Platform

Java Application

```
package samples.numbers;

import net.orthanc.flow4j.runtime.FlowManager;
import samples.numbers.flows.NumbersFlow;

/**
 * Class MainFlow
 * @author agreif
 */
public class MainFlow {

    public static void main(String[] args) {
        FlowManager.registerFlow(NumbersFlow.class);
        FlowManager.executeFlow("NumbersFlow-Start");
    }
}
```
